PROFIL

Software Engineer specializing in full-stack development (Angular, Spring Boot, Node.js), REST APIs, secure applications, SQL/NoSQL databases, DevOps (Docker, Kubernetes, CI/CD) and Big Data. Dual background in software and industrial engineering, enabling the delivery of reliable, scalable and business-oriented solutions.

TECHNICAL SKILLS

Web Dev

Angular | Spring Boot | Node.js | REST API | Spring Security

DevOps

Docker | Kubernetes | n8n | CI/CD (GitHub Actions) | Monitoring | Terraform | Ansible

Programming

Java | Python (Django, Pandas, NumPy) | JavaScript | SQL | Power BI

Methodologies

Agile | Scrum | Project Management

Mobile Dev

Flutter | Android Studio | Firebase

Big Data & Cloud

Spark (basic) | Hadoop (basic) | IBM Cloud | AWS (basic)

AI & ML

Deep Learning Fundamentals (NVIDIA)

FORMATION

SOFTWARE ENGINEERING DEGREE (IN PROGRESS),

Private Polytechnic School of Monastir

2023 – Present

TEXTILE ENGINEERING DEGREE,

National Engineering School of Monastir

2014 – 2017

INSTITUT PRÉPARATOIRE AUX ÉTUDES D'INGÉNIERIE DE NABEUL

2012

INTERNSHIP EXPERIENCE

Software Engineering & DevOps Intern, *Leoni*

- Designed and developed a full-stack internship management platform (React + Django): candidate applications, supervisor assignments, mission tracking, evaluations and automated report generation.
- Built secured REST APIs using Django with JWT authentication; implemented role-based access control (Admin, Supervisor, Intern).
- Developed a React frontend with dynamic dashboards, reactive forms and real-time notifications.
- Automated AI-driven workflows with n8n (CV parsing, Groq-based scoring, email notifications), maintaining parallel local and Kubernetes deployments with environment-specific configurations and authentication.
- Set up a complete DevOps cycle: Docker containerization, Kubernetes orchestration and CI/CD pipeline (GitHub Actions) to reduce load risks and ensure high availability.
- Configured monitoring and alerting to supervise application performance in production.
- Worked in Agile/Scrum methodology: sprint planning, code reviews and backlog management.

2026

Full-Stack Web Development Intern, *Startup*

2024 – 2025

- Designed and developed a complete e-commerce website: product catalogue, cart, order system and customer account area.
- Built a Node.js backend with advanced REST APIs: JWT authentication, product and order management and admin dashboard.
- Developed an Angular frontend with dynamic routing, lazy loading, state management and responsive UI.

- Deployed and maintained the application on a cloud server with a CI/CD pipeline.

PROJECTS

Data Analysis with Power BI

2025

- Designed a sales analysis report from a CSV file.
- Cleaned and transformed data using **Power Query**.
- Created key metrics: revenue by product, category, and customer.
- Developed interactive visualizations: column charts, pie charts, and pivot tables.
- Implemented dynamic filters (slicers) on dates and categories.
- Synthesized results: identified the best-selling product, most profitable category, and most loyal customers.

Data Analysis with Python (Pandas, Matplotlib)

2025

- Conducted exploratory data analysis on sales data from a CSV file.
- Calculated performance indicators (total revenue, revenue by product, revenue by customer).
- Cleaned and transformed data using **Pandas**.
- Generated charts (histograms, trend curves) using **Matplotlib**.

Stock Management Software, Java · JavaFX · SQL

2024

- Desktop application for complete stock management: product entries/exits, stock-out alerts and movement tracking.
- Graphical interface developed with JavaFX, relational SQL database for data persistence.
- Report and statistics generation on stock status and operation history.

Medical Management Platform, Angular · Spring Boot · Spring Security

2024

- Secure application for managing patient records, consultations and medical certificates.
- Spring Boot REST APIs with JWT authentication, dynamic Angular frontend.
- Features: patient registration, consultation tracking, medical certificate generation.

Library Management App, Flutter · Firebase

2024

- Full CRUD mobile application (books, authors) with advanced search and filtering functionalities.
- Intuitive UI/UX for seamless navigation and real-time data management via Firebase.

OTHER PROFESSIONAL EXPERIENCE

Quality produit, Demco Group

2021 – 2023

- Supervised product quality, conducted audits, implemented corrective actions.

Methods Officer, Isatex Industries

2020 – 2021

- Workflow organization, performance monitoring, non-conformities analysis.

Quality Manager, Bacovet Industries

2019 – 2020

- Managed quality procedures and performance indicators.
